

EXECUTIVE BRIEF

The AI Governance Frameworks Every Hiring Manager Expects You to Know

How NIST AI RMF, ISO/IEC 42001, and the EU AI Act fit together, and why knowing them gets you hired.

EXECUTIVE SUMMARY

How NIST AI RMF, ISO/IEC 42001, and the EU AI Act fit together, and why knowing them gets you hired.

KEY TAKEAWAYS

- Three frameworks come up again and again in AI governance hiring: NIST AI RMF, ISO/IEC 42001, and the EU AI Act.
- NIST AI RMF is voluntary guidance for managing AI risk, built around Govern, Map, Measure, and Manage.
- ISO/IEC 42001 is the first international management-system standard for AI, the ISO 27001 of AI governance.
- The EU AI Act is law: a risk-based approach that classifies AI systems by their potential impact.
- Most organizations use all three together. Knowing how they fit beats quoting any one of them.
